

Functions available on the SE-S3000/C3500 only

Support for 7,000 PLUs

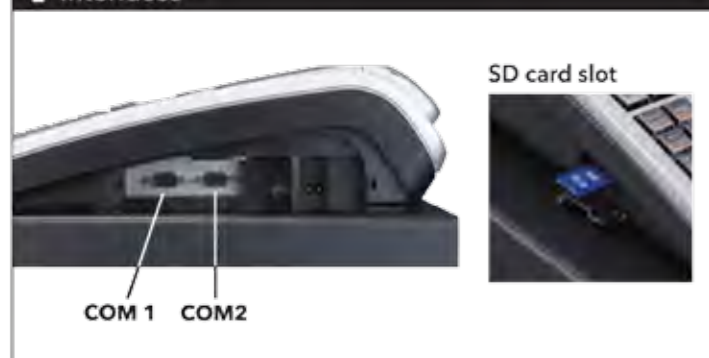

Support for 7,000 price lookups (PLUs) and use at up to 72 departments (30 x 2 departments for the C3500) makes these registers suitable for use in department stores and other stores carrying a wide variety of products and cafes and restaurants with large menus. The scanner function promotes quick and easy price registration.

*The SE-S400 supports 72 departments and 3,000 PLUs, and the SE-C450 supports 25 x 2 departments and 3,000 PLUs.

2-sheet printer

This printer can print a journal containing the sales amount and transaction details together with receipts. Since journal data can be recorded and stored, it can be used for confirmation, totaling, analysis, and other purposes.

Interfaces

Medium-size drawer

Two drawers are available. The small drawer efficiently holds five types of coin and four types of banknote, and the medium-size drawer holds eight types of coin and four types of banknote.

Intelligent setup using a PC

A PC setup tool is available to save time and effort in setup by using a PC to install a new cash register. Simply download the tool from a website. Data input on a PC can be transferred for registration on the register unit using an SD card.

SD card storage of checkout data

Use an SD card to back up checkout data stored in the register. Data can be viewed in CSV format on a PC, and journal output is possible.

Quiet, fast thermal printer

SE series registers are equipped with a low-noise thermal printer suitable for use in quiet retail environments. High printing speed contributes to a pleasant checkout experience.

Simple drop-in paper loading

Paper replacement is as easy as dropping in a new paper roll. The operator can quickly and easily change rolls without keeping customers waiting.

Printing of memorable graphic logos

SE series registers can print on receipts graphic logos that enhance a shop's image by imparting a clear, powerful image to customers.

Anti-bacterial keyboard

The keyboard is treated with an anti-bacterial process that inhibits the propagation of bacteria and mold. These registers are designed to be used with confidence even in restaurants, grocery stores, and other retail environments where concern for sanitation is required.

Calculator function

An easy-to-use calculator function is convenient for quick calculations in the checkout area.

Printing of operating instructions

Instructions for date and time adjustment, error reset, report issuance, and other register operations can be printed on receipt paper for quick reference in a pinch.
